2. Product description

2. Product description				
Commercial product name:	Duratron [®] D7000 PI			
These products are 'articles' ac	These products are 'articles' according to the Regulation (EC) No 1907/2006 (REACH).			
Material characterization:	Aromatic polyimide [PI]			
3. Product characteristics				
Form:	semi-finished products (disks, plates, tubes) / finished parts machined from semi-finished products			
Colour:	natural (chestnut)	Test methods		
Odour:	odourless			
Density:	1.38 g/cm ³	ISO 1183-1		
Melting temperature:	- Values for this property are only given here for amorphous material	ISO 11357-1/-3 is and not for semi-crystalline ones.		
Glass transition temperature:	365 °C	ISO 11357-1/-2		
Thermal decomposition:	> 500 °C			
Self-ignition temperature:	not applicable	ASTM D 1929		
Solubility in water:	insoluble			
4. Handling and storage				
Machining:	During machining of the semi-finished products, eva slipping or tripping hazard and observe the maximur dust levels on the workplace which apply in your cou during machining.	n allowable concentration of		
Storage:	The products shall be stored indoors in a normal env 30 - 70% RH) and kept away from any source of deg UV-lamps, chemicals (direct or indirect contact), ioni Dimensional changes (camber, warpage, shrinkage as slight colour shifts of the external surfaces can or does generally not pose a problem in case of semi-fi surface-layer is mostly removed anyway upon mach parts properties of materials The which are prone to water polybenzimidazole, may change significantly with sto water absorbed from the environment (this effect de and size of the products, the relative humidity and te environment and the time). However, this water absor a reversible one, the original material properties can drying them.	gradation such as sunlight, sing radiation, flames, etc.) of the products as well cour with time. The latter inished products since the ining them into finished r absorption, e.g. orage time as a result of pends very much on shape emperature of the orption phenomenon being		
Safety measures:	Standard industrial safety recommendations shall be Temperatures above the melting temperature shall b

5. Fire-fighting measures					
Suitable extinguishing media:	Water, foam, CO2. Adapted to the nature and extend of fire.				
Hazardous decomposition pro	Hazardous decomposition products:				
	The main products formed in case of overheating and combustion are carbon monoxide, carbon dioxide, traces of aniline, hydrogen cyanide and nitrogen oxide. Formation of further hazardous decomposition products depends upon the fire conditions and cannot be excluded.				
Special protective equipment:	Firemen should wear self-contained breathing apparatus and protective clothing to prevent contact with skin and/or eyes. If exposed to combustion fumes in a high concentration, bring the victim into fresh air. If molten material contacts skin, cool rapidly with cold water and obtain medical attention for removal of adhering material and treatment of the burn.				
6. Disposal considerations					
products is not classified as haza	 Ste Catalogue and Hazardous Waste List', uncontaminated waste from the ardous. The following six-digit codes can be used: 07 02 13 waste plastic from the manufacture, formulation, supply and use of plastics 12 01 05 plastic shavings and turnings 16 01 19 plastic, from end-of-life vehicles from different means of transport (including off-road machinery) and wastes from dismantling of end-of-life vehicles and vehicle maintenance 17 02 03 plastic construction and demolition wastes 20 01 39 plastics from municipal wastes (household waste and similar commercial, industrial and institutional wastes) When recycling is not feasible, waste disposal by incineration or landfill can be applied. Disposal methods shall conform to local or other government regulations. The products do not contain cadmium pigments or cadmium stabilisers. They are not biologically degradable, but based on the present state of knowledge no negative effects on the environment may be anticipated. 				
7. Marking and transport information					
Classification and labelling:	Hazard warning labelling in accordance with relevant EC-Directives is not required.				
International transport regulations: Not applicable					
8. Other information					
Consult the Mitsubishi website for the latest information on the Mitsubishi Chemical Advanced Material products (product data sheets, delivery programme, machining instructions, chemical resistance, regulatory information) as well as for our statements concerning the European Regulation (EC) No 1907/2006 (REACH).					

All statements, technical information, recommendations, and advice are for informational purposes only and are not intended and should not be construed as a warranty of any type or term of sale. The reader, however, is cautioned that Mitsubishi Chemical Advanced Materials does not guarantee the accuracy or completeness of this information and it is the customer's responsibility to test and assess the suitability of the products of Mitsubishi Chemical Advanced Materials in any given application or for use in a finished device.
